Mac / Windows

SMART & SHARP, YOUR ALL-PURPOSE SHARING WEAPON

Live Gamer Portable is a USB box that captures and streams your gameplay up to 1080p. Designed specifically for game lovers, this pocket-sized capture device comes complete with an H.264 hardware encoder, which guarantees lower CPU usage and smaller file size even for full HD footages. Plus, the file format is extremely easy to use for post-editing and uploading. In addition to supporting a wide range of resolutions, Live Gamer Portable adopts HDMI and component connections, making it a powerful complement for both console and PC gaming. The HDMI pass-through function ensures a smooth HD gaming experience even while recording. On top of that, connect directly to streaming platforms, and add live commentary during streaming. Now, sharing your legendary matches can be a reality.

Features

Hardware Compression

With the advanced H.264 hardware encoding technology, Live Gamer Portable takes care of the HD video processing while avoiding CPU overload. The hardware encoder also guarantees stable frame rates when you game, record, or even stream. With Live Gamer Portable, revel in a smooth gaming and viewing experience without dropped frames or choppiness.

Intuitive Software - RECentral

AVerMedia's exclusive RECentral software provides intuitive settings for live streaming and quick connection to popular streaming platforms. Broadcast live gameplay and commentary to TwitchTV and Ustream directly with your own account. Plus, the TimeShift function allows you to jump back easily to any footage where you want to start recording. In addition, RECentral for Mac is also available now! Capturing and snapshotting great moments directly to your Mac has never been simpler.

User Friendly Hot Button & LED Indicator

The on-board hot button and LED indicator of Live Gamer Portable bring gamers a convenient user experience. One press on the Hot Button activates recording or streaming in no time. As for LED indicators, the color of illumination and the lighting frequency will alert you to its working status with one glance. Preserve and share your gameplay with Live Gamer Portable – it's easy!

Fully Compatible with XSplit

For those looking for advanced streaming functionalities, Live Gamer Portable is fully compatible with XSplit Broadcaster! Besides direct streaming and intuitive overlay editing, XSplit Broadcaster lets you add different types of media to the stream, such like webcam, graphics and other video inputs. You can even customize scenes to meet various streaming purposes.

PC-Free Mode

The Live Gamer Portable provides PC-free option, which allows you to record the gameplay up to 1080p without a PC. Just flip the mode switch, insert a SD card, and you are ready to go! With the PC-free mode, Live Gamer Portable can be powered by your game platform via USB; no additional power outlet is needed. Whether you prefer PC or console gaming, the Live Gamer Portable will set you free from any hindrances to game on the go!
