

LIVE GAMER HD

CAPTURE & SHARE YOUR PC GAME FOOTAGES

**FULL HD
1080P**

- Record HD gameplay Via HDMI / DVI Adapter
- Hardware encode / Extreme Low CPU Consumption
- Smooth In-game Experience Guaranteed
- Stream and Make Live Commentary Simply

The Live Gamer HD is designed definitely for PC game lovers. It supports a wide range of graphics card's resolutions and HDMI/DVI input. With the handy I/O design, you can record full HD 1080p game footages from any HDMI-supported devices.

How It De-escalate CPU Consumption

With the advantage of H.264 hardware encoder, the Live Gamer HD allows you to record your PC game footages on the same gaming machine without draining the system resources.

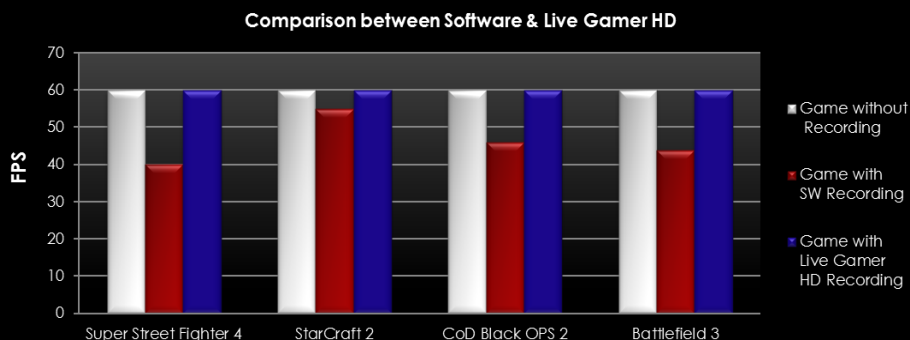

Super Low CPU consumption while Recording / Streaming

CPU: i5
RAM: 8GB
Graphics: AMD Radeon HD7800

We Understand the Importance of FPS

The gaming performance will not be affected and the gameplay can be preserved without frame drop. You can now focus on how to create fabulous contents without annoying stutter.

Bring Your Games To Live Is So Simple and Hassle-Free

RECentral, the gaming-oriented application bundled with Live Gamer HD, provides intuitive configurations for gamers from novice to hardcore. Within a few easy steps, you are good to go to record your PC game footage, take snapshots, or make your game videos go live! It also allows you to record your voice commentary along with the in-game footages to make your video gameplay more impressive.
