

EXTREMECAP U3

Capture Uncompressed HD Video up to 1080p 60fps

1080p 60fps
Video Capture

USB 3.0 for
Uncompressed Video

Compatible with
Popular Video Software

ExtremeCap U3 is a USB 3.0 capture box that allows you to capture, record and stream stunning 1080p 60fps gameplay via HDMI and component inputs from PC, Xbox 360, PlayStation 3 and Wii U. It is capable of transmitting uncompressed 1080p 60 fps video; preserving the smooth of video; twice the amount of frame for video editing comparing to 1080p 30fps. The USB 3.0 Diagnosis Tool is included to ensure the hardware compatibility.

With the bundled software, RECentral, the users can record and stream video footages with customizable settings. In terms of software compatibility, the ExtremeCap U3 works perfectly with DirectShow compliant software such as XSplit, Wirecast, Adobe Premiere Pro CS, Sony Vegas, VLC media player, PotPlayer, and so forth.

USB 3.0 for direct power supply & uncompressed data transfer

RECentral

RECentral provides intuitive settings for recording and streaming gameplay footage up to 1080p 60fps. It also provides quick accessibility to popular streaming platforms such as TwitchTV and Ustream. Furthermore, you can record your voice commentary along with the footages to make your video more impressive.

Adobe Premiere Pro CS6 & Sony Vegas Plug-ins

Edit uncompressed HD gaming footage with the software you love. The Adobe Premier Pro CS6 and Sony Vegas plug-ins provide smarter operating flow. No more time wasting on moving HD projects back and forth.

AVerMedia USB 3.0 Diagnosis Tool

The AVerMedia USB 3.0 Diagnosis Tool is included for testing the performance of the connected USB 3.0 port. It lets you know whether or not the USB 3.0 port on your desktop or laptop is capable of transmitting 1080p 60fps uncompressed video. The tool provides an option to downscale the video frame rate while the performance of the USB 3.0 port is insufficient.

Specification

Input Signal

- HDMI
- Component

Recording Format

- MP4 (H.264, AAC)

Package Include

- ExtremeCap U3 (Weight: 182g)
- USB 3.0 cable
- Component Video / Stereo Audio
- Quick Installation Guide

System Requirement

- For HD 1080p 60fps Video Preview (H.264)
 - Intel® Core™ i5-3400 Series with Ivy bridge platform and 4G RAM
- For HD 1080p 60fps Video Recording (H.264)
 - Please check the latest info. on AVerMedia website
- For HD 720p 60fps Video Recording (H.264)
 - Intel® Core™ i3-3200 Series with Ivy bridge platform
- VGA Card with Support for DirectX 10.C or above
- Windows 8 (32/64 bit), Windows 7 (32/64 bit)
- USB 3.0 Interface (Verified chipset: Intel Native, Renesas, Fresco)
