Introduce ExtremeCap 910 into speeches, meetings or corporate training and transform any content afterward into videos-on-demand. Without complicated PC software installation, ExtremeCap 910 provides users with an efficient way to record content. A friendly set-up process and its portability enable users to quickly start recording for any situation. With one click of the button, users can easily start and stop the recording. Moreover, this recording box can record HD content of up to 1080p from a wide range of media sources. To streamline the recording process and better capture voice content, a built-in microphone is included in the ExtremeCap 910.

Lecture / Speech

The recorded content can be used to promote the event or to reach more people such as worldwide audience.

Corporate Training

Corporate can save the cost in hiring lecturers and also staffs are able to review the training materials again and again.

Internal / External Meeting

The recorded content can be used as reference for recapping with colleagues later after meeting with clients.

Features

Quick Set-Up Prior to Use

A user-friendly set-up process enables users to quickly connect this capture box with devices. Without complicated PC software installation, ExtremeCap 910 provides users an efficient way to record the content.

One Click Starts Recording

With one click of the button, users can start or stop recording within a second. From there, users can carry this portable device around for any scenario use.

Greater Background Noise Reduction

ExtremeCap 910 records only the speaker's voice and automatically cleans out extraneous background noise, even when placed in close proximity to noise-inducing objects like projectors.

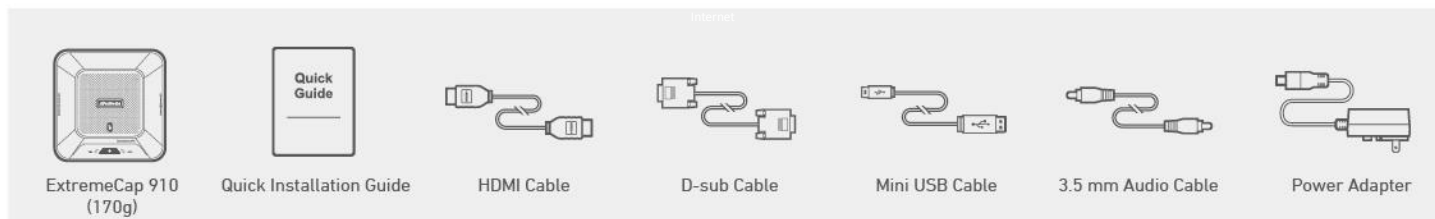

Record Without a Microphone

Enjoy prime recording quality with ExtremeCap 910. With its ability to take in voices from a range of distances without the aid of microphones, ExtremeCap 910 is a recommended tool for
