

LGP LITE GL310

1-Click and All Captured

FULL HD
1080P

Supports
Mac / Windows

LGP Lite is a USB 2.0 box that captures and streams your HD gameplay up to 1080p. A successor to the Live Gamer Portable (LGP), LGP Lite eliminates the PC-Free mode for those who prefer working on a PC or laptop. Just like the LGP, this capture device comes with H.264 hardware encoder, delivering lower CPU usage and smaller file size even for full HD footage. Plus, the file format is super easy to use for post-editing and uploading content.

This capture box acquires HD footage via the HDMI connection and guarantees a smooth HD gaming experience with its pass-thru function. In addition, the on-board hot button provides for quick recording and streaming with just one click. From there, connect directly to streaming platforms; you can even add live commentary while streaming. With LGP Lite, make your gameplay legendary.

Specifications

- Input Signal:
 - HDMI / DVI*
 - 3.5mm Audio
 - Output Signal:
 - HDMI / DVI*
 - 3.5mm Audio
- *HDMI to DVI adaptor not included.

Features

Hardware Compression

With the advanced H.264 hardware encoding technology, the LGP Lite takes care of the HD video processing while avoiding CPU overload. The hardware encoder also guarantees stable frame rates when you game, record, or even stream. With Live Gamer Portable Lite, revel in a smooth gaming and viewing experience without dropped frames or choppiness.

RECentral

AVerMedia's exclusive RECentral software provides intuitive settings for live streaming and quick connection to popular streaming platforms. Broadcast live gameplay and commentary to TwitchTV and Ustream directly with your own account. Plus, the TimeShift function allows you to jump back easily to any footage where you want to start recording. In addition, RECentral for Mac is also available now! Capturing and snapshotting great moments directly to your Mac has never been simpler.

User Friendly Hot Button & LED Indicator

The on-board hot button and LED indicator of the LGP Lite bring gamers a convenient user experience. One press on the Hot Button activates recording or streaming in no time. As for LED indicators, the color of illumination and the lighting frequency will alert you to its working status with one glance. Preserve and share your gameplay with the LGP Lite – it's easy!
