Capture & Share Your PC Game Footages

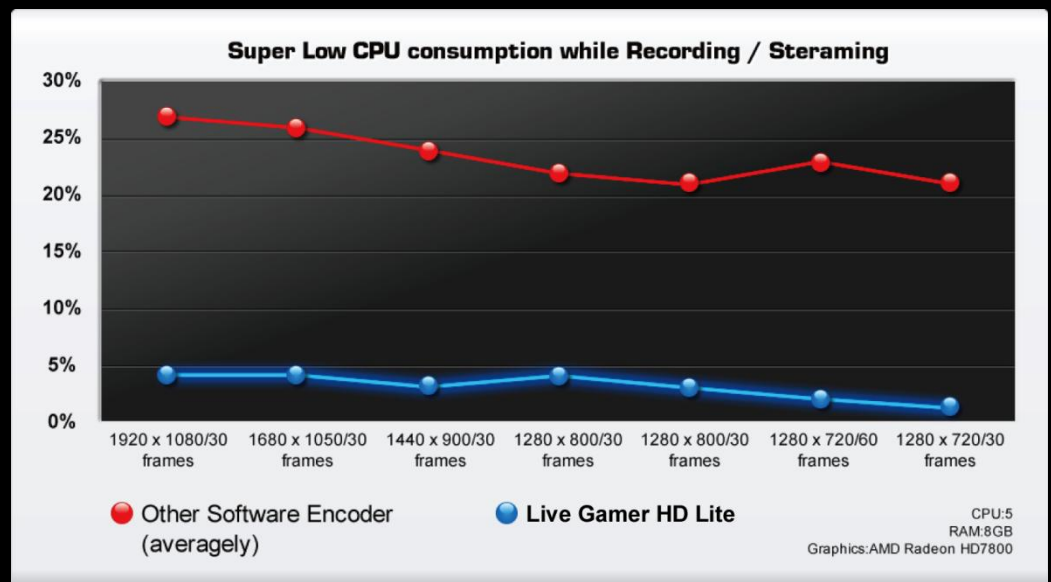

LIVE GAMER HD LITE

- Record HD gameplay Via HDMI / DVI Adapter
- Hardware encode / Extreme Low CPU Consumption
- Smooth In-game Experience Guaranteed
- Stream and Make Live Commentary Simple

The Live Gamer HD Lite is designed definitely for PC game lovers. It supports a wide range of graphics card's resolutions and HDMI/DVI input. With the handy I/O design, you can record full HD 1080p game footages from any HDMI-supported devices.

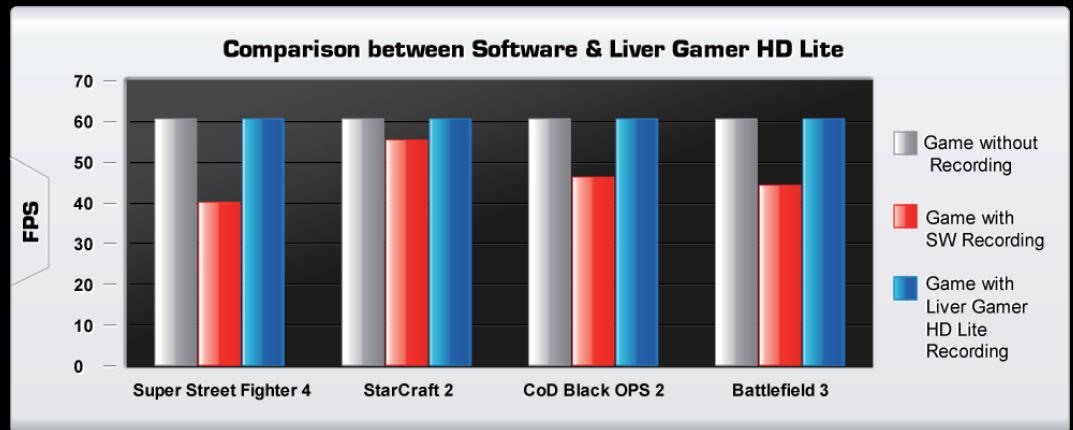

How It De-escalate CPU Consumption

With the advantage of H.264 hardware encoder, the Live Gamer HD Lite allows you to record your PC game footages on the same gaming machine without draining the system resources.

We Understand the Importance of FPS

The gaming performance will not be affected and the gameplay can be preserved without frame dropping. You can now focus on how to create fabulous contents without annoying stutter.

Bring Your Games To Live Is So Simple and Hassle-Free

RECentral, the gaming-oriented application bundled with Liver Gamer HD Lite, provides intuitive configurations for gamers from novice to hardcore. Within a few easy steps, you are good to go recording your PC game footage, taking snapshots, or making your game videos go live! It also allows you to record your voice commentary along with the in-game footages to make your video gameplay more impressive.
