

AVerTV Nova T2 A757

Taking Digital TV to the Next Level

Crafted with the latest cutting-edge DVB-T2 technology, AVerTV Nova T2 is among one of the most powerful TV tuner cards available today. An HD TV tuner card with PCI-E interface, AVerTV Nova T2 embodies a comprehensive PCTV solution for watching digital TV. Moreover, it supports MPEG-2, MPEG-4, and H.264 HDTV formats up to 1080p/720p, rendering its full HD TV display crystalline and crisp.

Other notable features of AVerTV Nova T2 include its schedule recording and wake-up recording capabilities, the built-in electronic program guide (EPG), and the time-shifting function. Moreover, it also offers full third-party support with ProgDVB, the universally popular software for watching DVB TV.

Best of all, AVerTV Nova T2 comes equipped with its own mobile application: HomeFree TV. Created exclusively for the AVerTV product line, the app is compatible with both Android and iOS. Enhance wireless TV-watching through the convenience of your mobile device, anywhere and anytime. More than one device can be connected onto the app, allowing you and your family or friends to enjoy simultaneous viewings!

About AVerTV 3D and HomeFree TV

Intuitive User Interface and 3D Display Mode

With frequently-used buttons located on the toolbar, the intuitive user interface allows you to switch channels or adjust volume as easily as any TV. For optimal 3DTV viewing experience, view 3DTV with NVIDIA 3D Vision Kit.

Exclusive Color Enhancement

The color enhancement feature adjusts video quality while displaying each hue with sharp vividness. De-interlacing with a smooth edge option produces high video quality without depleting CPU resources.

Exclusive Mobile App

Enhance your viewing experience with HomeFree TV, the mobile app created exclusively for AVerTV. Connect up to 5 devices per card and view any show from your phone or tablet. Channels can also be keyed into the device or selected from the menu for more options.
