

AVerTV Mobile 510 EW510

Watch live TV on your notebook and Android devices

TV is a big part of our lives. AVerTV Mobile turns your mobile device into a TV. You won't have to make time for favorite shows, or feel bored while waiting for your plane.

AVerTV Mobile 510 is no larger than a thumb drive. Plug it into your Android device, or notebook, and you'll have TV on your screen in no time with the complementary free app – AVerTV Mobile II for Android, and AVerTV for PC, no Internet connection required! The app automatically detects DVB-T or DVB-T2 signals and scans for channels in your area. It supports recording, electronic program guide (EPG), and bilingual audio.

The exclusive high-gain antenna helps strengthen your reception, especially for outdoor use. You can watch DVB-T/DVB-T2 TV while camping in a forest, hiking on a mountain, or relaxing on the beach.

Features

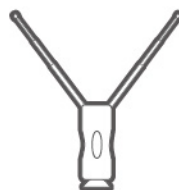

- Compatible with Android and Windows
- Covers DVB-T/DVB-T2
- High-gain antenna Included
- No battery needed
- Ultra lightweight
- Aesthetic design
- Free app and software

Watch Digital TV on
