AVerTV Express 009

AVerTV Express 009 provides you a marvelous TV viewing experience from the comforts of your sofa to PC. Turn our PC into your personal multimedia center by enjoying worldwide analog TV and FM radio broadcasting with stereo sound! AVerTV Express 009 utilizes PCI-Express interface to guarantee that your favorite shows can be preserved with precision and smoothness.

The exclusive AVerTV 3D software program offers advanced real-time H.264 recording compression technology up to a resolution of 320X240 iPod video for format recording. Whether you want to schedule or record the shows you love, the software seamlessly converts it into PSP, iPod, iPhone or Apple TV format, contingent upon your need. Save time on file conversion by importing your recording to your devices.

You can also pause live TV while you are away and resume it at any time with TimeShift, or preview from 4 to 64 channels all on one screen. With the built-in AV input, AVerTV Express 009 enables you to digitize video from various analog video sources and turn them into DVDs easily. Now you can sit back, relax, and enjoy your PCTV !

About AVerTV 3D and HomeFree TV

Intuitive User Interface

AVerTV 3D provides you an intuitive user interface with frequent-used function buttons listed right on the toolbar. You can easily switch channels and adjust volume.

Upload file to YouTube &

Facebook

You can upload your video files to YouTube and Facebook and share with friends or others.

Exclusive Color Enhancement

The Color Enhancement adjusts video quality and show the astonishingly sharp and vivid video color. De-interlace with Smooth Edge Option gives you the stable and smooth video quality without overeating CPU resource.

Exclusive Mobile App

Enhance your viewing experience with HomeFree TV, the mobile app created exclusively for AVerTV. Connect up to 5 devices per card and view any show from your phone or tablet. Channels can also be keyed into the device or selected from the menu for more options.
