

AVerReceiver 110/AVerMedia CMS

AVerReceiver 110 (SR110)

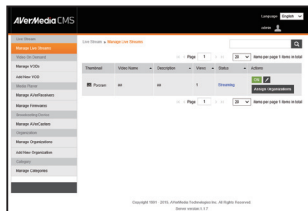

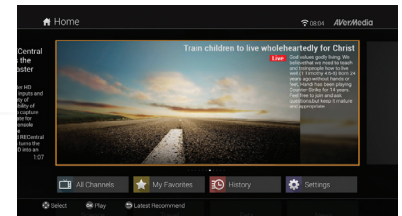

HD 1080P HDMI TV Dongle

AVerReceiver 110 provides increased convenience in broadcasting and streaming. By plugging this dongle into the TV, users can receive signals sent via HDMI and delivered as high-quality video by AVerMedia streaming devices.

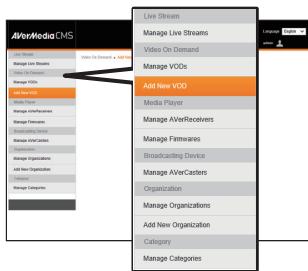

Features

- HDMI 1.4a high-resolution video and audio output at HD 1080p/DTS/AC3
- Easy-to-use VOD management with AVerMedia CMS
- Live streaming and broadcasting with AVerMedia CMS and AVerCaster HD Duet Plus

AVerMedia CMS (CMS)

AVerMedia CMS (Content Management System) administers and manage Video On Demand (VOD) contents and live broadcasts from AVerCaster HD Duet Plus (F239+). All the content can be received by AVerReceiver 110 (SR110).

Through AVerMedia CMS, administrators can manage:

- Live Streams – start or stop live broadcasts, allowing or disallowing viewers to see the channels.
- Video On Demands (VODs) – upload videos, allowing viewers to watch them using their AVerReceiver 110.
 - Organizations – categorize videos by their genres.
 - Media Players & Broadcasting Devices – designate each AVerReceiver 110 to an Organization, and simultaneously administer broadcasts from multiple AVerCaster HD Duet Plus.

Specifications
